

## How to mop using the presoak method

- 1) Collect the number of fringes required and calculate the amount of solution required
  - We at Worchem recommend 190ml per 62 cm Trust Fringe

- 2) Add fringes vertically either straight or rolled into solution/bucket

- 3) Flip fringes onto other edge so they soak from both sides.

- 4) Lay soaked fringes on the rack so if there is excess water they are out of it

- 5) Attach a fringe onto the mop frame - push the frame onto the back of the fringe

- 6) Mop until used up/dirty  
(we recommend 45-60m<sup>2</sup> per fringe)
- 7) Remove fringe from frame and place into laundry bag to decrease contamination
- 8) Attach a new fringe onto mop frame and continue mopping.  
Repeat until completed

Fringes	Volume of Solution	Area to be cleaned (50m <sup>2</sup> per fringe)
1	190 ml	50 m <sup>2</sup>
2	380 ml	100 m <sup>2</sup>
3	570 ml	150 m <sup>2</sup>
4	760 ml	200 m <sup>2</sup>
5	950 ml	250 m <sup>2</sup>
6	1.14 L	300 m <sup>2</sup>
8	1.52 L	400 m <sup>2</sup>
10	1.9 L	500 m <sup>2</sup>
12	2.28 L	600 m <sup>2</sup>
